

FOREST APP

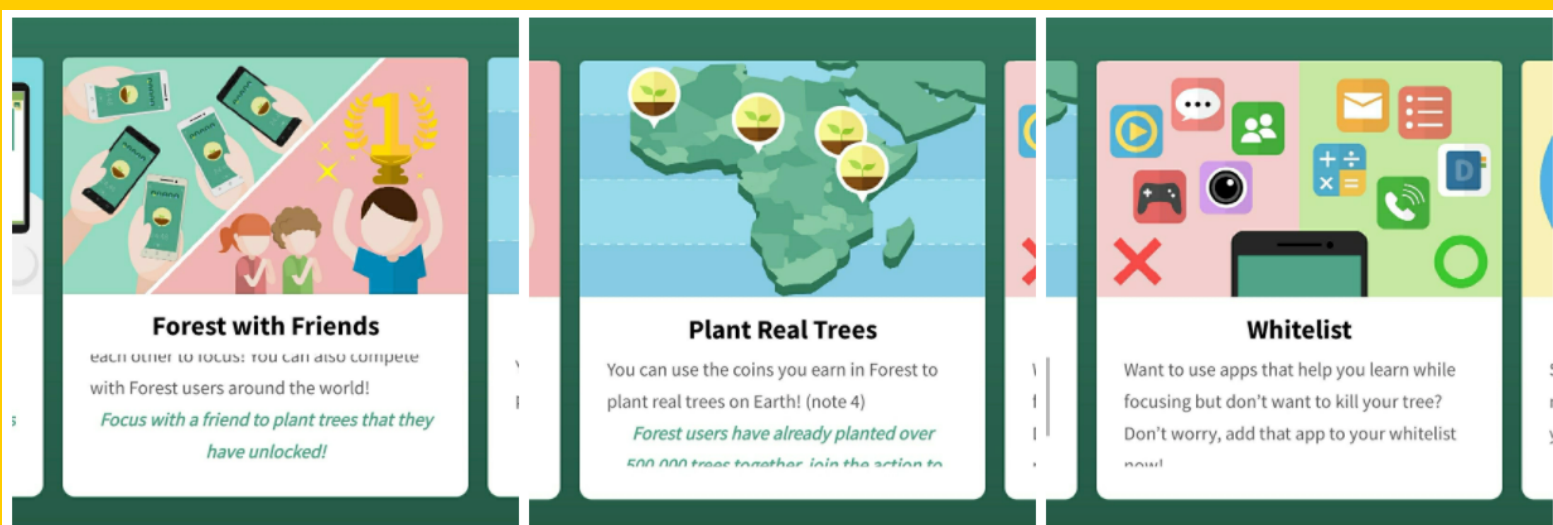

Keep yourself motivated!

INTRODUCING THE APP

The Forest App is an app used to help motivation. This is done by planting trees and setting a timer to keep your focus. Once you have created an account on this app you can plant trees and add friends to see how many trees they have planted and collaboratively work together so if one person kills a tree the whole ground trees are killed. When you leave the app the tree will be killed therefore keeping focus on school work and not social media, games, or other apps on your device.

what are the features?

Once you start an app, you will see a timer where you can set the time you want to plant the tree for. The longer you focus, the fancier the tree looks like. You can do as much trees you want in one day, there is no limit. If you successfully grow the tree, you will get the coins. You can gather them to buy more beautiful trees.

If you purchase the pro version of the app, you can connect to your friends and compete with other users around the world. Also, you can plant ACTUAL TREES on earth. You can gather the coins and if you use them, someone else will plant the tree for you so it is an 'eco-friendly' motivation app. Lastly, you can set up some apps that you really have to use. Unnecessary apps will be blocked but some important ones such as calculator, emails, calls will be allowed as long as you don't get interrupted by them.
